Outer membrane protein B precursor (168 kDa surface-layer protein)

(Surface protein antigen) (Cell surface antigen 5) (Sca5) (rOmpB)

(rOmp B) [Contains: 120 kDa surface-exposed protein (Surface protein compB); 32 kDa beta peptide]
                       Rickettsiaceae;

120 kD surface-exposed protein of Rickettsia rickettsii.";

MOL. Microbiol. 3:1579-1586(1989).

-1- FUNCTION: THE 120 kDa SURFACE-EXPOSED PROTEIN IS A MAJOR

STRUCTURAL PROTEIN WHICH MAY PLAY A ROLE AS A RICKETTSIAL

VIRULENCE FACTOR AND/OR IMMUNOGEN DURING INFECTION.

-1- SUBCELLULAR LOCATION: CELL WALL. THIS BACTERIUM IS COVERED B

LAYER WITH HEXAGONAL SYMMETRY.

-1- SIMILARITY: BELONGS TO THE RICKETTSIAE OMPA/OMPB FAMILY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 DOMAIN
